Meeting records  Transcript

Summary

The team refined project workflows and event objectives while standardizing future meeting agendas for greater consistency.

Event and Content Strategy

Renaming the hackathon to Agent Build Lab clarifies the focus on education over

finished products. Ebook compilation reviews for content coverage are currently underway.

Project Management Alignment

Progress across 5 work buckets remains ongoing with final deadlines set for August 25. Standardizing future meeting agendas around 4 core pillars ensures operational transparency.

Accessibility Tool Demo

An open-source prototype for testing website accessibility through hybrid deterministic methods was presented. Internal application for accessibility skills is under consideration.

Decisions

Aligned

- **Establish August deliverable deadlines** Deliverable deadlines are set for August 11th (soft) and August 25th (hard) for all working group projects.
- **Standardize meeting agenda format** Meeting agendas will prioritize status updates on work buckets, the ebook, and the hackathon, followed by demo sessions.

We've **updated the Decisions section** using your feedback.

Let us know what you think: [Helpful](#) or [Not Helpful](#)

Next steps

- ☐ [Rebecca] Chase Bucket 1: Message the Slack channel to request an update from Tim regarding bucket 1 progress.

- ☐ [Rebecca] Follow up Bucket 3: Contact Doug and Ryan in Slack to receive an update on goal directed task oriented agents.
- ☐ [George] Complete Bucket 2: Allocate time to work on LLM directed workflows.
- ☐ [Daniele Stroppa] Complete Bucket 4: Perform work for long running and policy driven agents during the Friday afternoon session.
- ☐ [Everett] Coordinate Bucket 5: Message Danny on Slack to arrange collaboration for bucket 5 tasks.
- ☐ [Rebecca] Notify Marketing: Communicate the project timelines to the marketing team to prevent misalignment.
- ☐ [Rebecca] Send Brief: Provide the completed hackathon brief to George for further action planning.
- ☐ [Rebecca] Update Agenda: Modify the recurring meeting agenda and post a summary of today's discussion to the team Slack.
- ☐ [George] Share Tool: Distribute the accessibility tool shared by Everett to relevant internal colleagues.

Details

- **Mac X Amsterdam Hackathon Planning:** Rebecca Veldon proposed renaming the hackathon to "Agent Build Lab" to clarify that the event will focus on the education and experience of building agents rather than delivering a completed product. The event is tentatively scheduled for a Tuesday or Wednesday, and Rebecca Veldon requested that participants bring end users and volunteers to assist ([00:05:12](#)). Once the project brief is finalized, Rebecca Veldon will share it with George Fitzgibbons to begin coordinating specific action points ([00:15:21](#)).
- **Ebook Development and Review:** Everett Zufelt authored an ebook compiling previous articles and requested that group members review specific chapters to ensure comprehensive coverage ([00:06:27](#)). To facilitate this, Everett Zufelt used Claude to tag relevant individuals for feedback based on their previous contributions, with the goal of collecting all reviews before the next working session to ensure a release by the end of August ([00:08:53](#)).

- **Project Bucket Updates:** The group reviewed the status of five work buckets: LLM assisted workflows, LLM directed workflows, goal directed task orientated agents, long-running and policy driven, and collaborating across domains and organizations. Rebecca Veldon will follow up via Slack with Tim, Doug, and Ryan regarding their assigned buckets. George Fitzgibbons and Daniele Stroppa committed to blocking time to advance their respective work, while Everett Zufelt and Danny Lake agreed to coordinate asynchronously on their shared bucket ([00:10:50](#)).
- **Project Bucket Timelines:** To maintain momentum, the group established a soft deadline of August 11 and a hard deadline of August 25 for all project buckets. Everett Zufelt will conduct a progress check during the working group meeting on July 28 to ensure all teams are on track, as Rebecca Veldon will be unavailable ([00:12:54](#)).
- **Meeting Structure and Agenda:** The team agreed to standardize future meetings around four main pillars: updates on the buckets, the ebook, the hackathon, and random demos ([00:15:21](#)). George Fitzgibbons and Rebecca Veldon determined that meeting invitations will now include a clear agenda to improve transparency and attendance, and Rebecca Veldon will update the Slack channel to reflect these organizational changes ([00:17:24](#)).
- **Accessibility Testing Tool Demo:** Everett Zufelt shared a prototype for an open-source tool designed to test website accessibility for keyboard-only or screen-reader users through a hybrid deterministic approach. Everett Zufelt provided a link in the Slack channel for the team to review, and George Fitzgibbons expressed interest in sharing the tool internally regarding accessibility in skills ([00:18:44](#)).

You should review Gemini's notes to make sure they're accurate. [Get tips and learn how Gemini takes notes](#)

Agent Ecosystem Working Group 1: Enterprise Agent Architecture - MACH Alliance - Transcript

00:00:09

Everett Zufelt: Good afternoon.

Rebecca Veldon: Hello. Oh, one

Everett Zufelt: Look at Danny.

Rebecca Veldon: sec.

Danny Lake: Good morning.

Everett Zufelt: Bright and early for Danny. Actually, it's not that bright and early.

Danny Lake: This is this is

Everett Zufelt: This is regular.

Danny Lake: regular.

Everett Zufelt: Rebecca, I don't know if you know, but Danny's uh in Victoria, so he's eight hours off of UK time.

Danny Lake: Yeah.

Rebecca Veldon: What time is it? Where you are?

Everett Zufelt: 9 8:00.

Danny Lake: 8 8 o'clock.

Everett Zufelt: Oh, there you go.

Rebecca Veldon: Jeez.

Everett Zufelt: Oh,

Danny Lake: I don't know.

Everett Zufelt: because you guys stopped doing savings,

Danny Lake: I think we just do.

Everett Zufelt: right?

Danny Lake: Yeah,

Everett Zufelt: Is that what you did?

Danny Lake: we did. We abolished it. It's crazy.

Everett Zufelt: Oh, that's really confusing now.

Danny Lake: It's going to be weird next time.

Everett Zufelt: So it's a No kidding. So it's like

Danny Lake: Next winter.

Everett Zufelt: Yeah.

Danny Lake: It didn't like are we going to is Eastern time going to be or hours away from me?

00:01:11

Everett Zufelt: I don't I don't know.

Danny Lake: I don't

Rebecca Veldon: Yeah.

Everett Zufelt: This You know what? I might be old.

Danny Lake: know.

Everett Zufelt: I don't love daylight savings time, but I've always had it. So now everybody wants to get rid of it. And I wasn't good with time zones when we all did the same game. Where is hell not going to be good with them? Where's this person live? What time zone are they in? Do they observe daylight savings time? I will be lost forever. Hey, George.

Danny Lake: I thought it was countrywide.

Everett Zufelt: No.

Danny Lake: Oh, okay.

Everett Zufelt: Then there's like weird ones in America where like I know particular because I was there Idaho the north of the like east west split I can fully wrap my head around. Idaho the north part of the state is in a different time zone than the south part of the state.

Danny Lake: That's

Everett Zufelt: So it's like a north it's a north south split.

Danny Lake: weird.

00:02:28

Rebecca Veldon: Homelands are just

Everett Zufelt: I like to blame Yeah, I used to live in Peterborough,

Rebecca Veldon: weird.

Everett Zufelt: Ontario in Canada, which the Canada History commercials tell me is the home of Sir Sanford Fleming, who invented standard time zones. So there you go. Next time you're at pub trivia night,

Danny Lake: Yeah,

Everett Zufelt: you now know when they say when you now when they say in what

Danny Lake: that's good. Trilia.

Everett Zufelt: city did the inventor of standard time zones live? You know, it's Peterborough, Ontario.

Rebecca Veldon: Right. Did we want to get started and just have people trickle in as they

Everett Zufelt: George,

Rebecca Veldon: do?

Everett Zufelt: you there?

George Fitzgibbons: Yeah. Yeah. Sounds good to me.

Everett Zufelt: Sounds good.

George Fitzgibbons: Yeah. So, uh, I missed end of last week, so I guess anybody from who was at the last session want to do a quick catch up where we stand or if we missed anything big. The two maybe three things that come to mind for me is just recap where we're at on buckets, how that's all moving, if we think that's good direction to keep marching.

00:04:05

George Fitzgibbons: And then uh I see Rebecca here. Uh I did just want to take a query and see if anybody's going to that Mac Mach X in Amsterdam because I think we are. Rebecca call out uh gonna do some hackathon stuff. So, it would be sweet if more people were going. So,

Rebecca Veldon: Yes.

George Fitzgibbons: if anybody knows if they're going, I think I'm going to go now. So, uh if we're doing a hackathon, I'm pumped. It'll be cool. But if any other people are going and then the other topic I don't know if we talked about last week I think that could be interesting if we could start penciling into these by white weekly meetings is some sort of demo session where round robin random pickup but uh just like demoing stuff in the wild. Uh, I think I mentioned this, but uh, Doug from Vox gave me a demo of an agent he built randomly, and I was, dude, like, show this to the group. Like, I feel like everybody's building cool agents.

00:05:12

George Fitzgibbons: We should just talk about it more.

Rebecca Veldon: So shall I jump in on the Mac X

George Fitzgibbons: Uh,

Rebecca Veldon: bits? So, I am just in the process of finishing off a brief. I just had a bit of an existential crisis earlier over our goals for the hackathon. So, uh spoke with Evra on to what we're wanting our end goal to be because the chat I was having with Holly, I mentioned that we weren't actually going to be able to finish building a whole agent as one of the the buckets for the hackathon. Uh so we're going to be focusing on the experience and the education of building an agent. Uh we're probably going to term it slightly different from a hackathon. There's a couple of uh names penned and I'm leaning towards agent build lab uh just cuz then it makes it really clear what this is because there are so many different types of hackathons that this is just nice, clear, concise in the name of what's going on. Um I'm trying to confirm what day if it's on the Tuesday or the Wednesday that we're going to be featuring this hackathon.

00:06:27

Rebecca Veldon: We are going to be starting partway through lunch uh doing basically an educational piece of what is an agent, why is an agent, uh these are the working groups and then spending the afternoon with some space for people to actually build, workshop, help people set up. Uh for that we are of course going to need volunteers and if anyone is available for that we would greatly appreciate you. Um if you are wanting to invest a lot more into the hackathon please bring someone uh an end user uh to the event uh I can send people links so you can tell them where to register which I'm just getting you the link now. That was a little bit delayed. There we go. So, that is me speaking very very quickly about Mac and X. Um, now on stuff that we're working on. We are working on the three buckets, but there is also the ebook which Everett has written up which has been pulled from all of our previous articles. I do have an ask of the group.

00:07:39

Rebecca Veldon: Um, if possible, can people read a single chapter? Uh, so it's not the full 50 pages. It is just a segment and we'll be able to call out who is reading which bit. I'm very aware of my technical ability. Uh, so if it's okay with everyone, I'd like to go over the executive summary myself cuz that is non-technical terms that I can wrap my head around. Um then we have part one which is the model, part two the five archetypes, part three putting it together. Then uh closing where most organizations sit and how to contribute and then we've got the references and further readings and so forth so on and so forth. Does any of those parts interest people to read through?

Daniele Stroppa: So I I have already reviewed the whole document and provided ever

Rebecca Veldon: Fantastic.

Daniele Stroppa: some some live feedback. Um I can take any of those parts again if we need to do a

Everett Zufelt: No,

Daniele Stroppa: a deeper.

Everett Zufelt: I I I think you're I think you did a great first pass and I implemented the feedback.

00:08:53

Daniele Stroppa: Yeah,

Everett Zufelt: I think it's good to get get another set of eyes on it,

Daniele Stroppa: I saw that.

Everett Zufelt: too. But I think that I really appreciate you going through the whole doc.

Rebecca Veldon: Yeah.

Everett Zufelt: Uh, I did, sorry, uh, Rebecca, I did ask Claude who might be best to look at some of these sections. I excluded myself and and Danielle because we already took a look.

Rebecca Veldon: Okay.

Everett Zufelt: Um, and for I think Tim and George and Ryan who may not be on the call and I think for a few folks um I've act Claude actually tagged them on the poll

request for some sections where I felt um or Claude felt based on where they'd contributed before uh that they would be able to give some feedback.

George Fitzgibbons: That's very cool.

Everett Zufelt: Yeah. Uh, it's called basically,

George Fitzgibbons: Uh,

Everett Zufelt: hey, Tim wrote this source document, so he should review this chunk of the ebook.

George Fitzgibbons: I'm trying to find the PR draft.

Everett Zufelt: Uh, it's 20 20. Yeah,

George Fitzgibbons: Okay,

00:09:52

Everett Zufelt: I I'm lazy. I don't do anything anymore.

George Fitzgibbons: cool.

Everett Zufelt: Whether it's claude cla or claude code, I do nothing. I just sit sit around and tell agents what needs to be done.

George Fitzgibbons: There we go. Uh, cool. Yeah. No, I see the SPR. That's very cool. Uh, I'll take a look for

Everett Zufelt: I appreciate that.

George Fitzgibbons: sure.

Rebecca Veldon: Fantastic.

Everett Zufelt: Great.

Rebecca Veldon: And if ideally we can get that back before the next working session, which isn't going to be in two weeks, that get then gives us a timeline to get this all read, get this feedback so we can aim to get this released by the end of August with any edits and anything that needs to be done. So, are we happy to move on to buckets? Perfect. So, I've just popped into the chat the different buckets that people have asked to be a part of.

George Fitzgibbons: Yep.

Rebecca Veldon: Uh, so we've got the first bucket, which is LLM assisted workflows with Tim.

00:10:50

Rebecca Veldon: LLM directed workflows, which is with Devon and George. Uh, bucket three, goal directed task orientated ages, which is Doug and Ryan. Then bucket four, longunning and policy driven, which is Daniela. And then number five which is collaborating across domains and organizations which is Danny and Everett. So uh Tim is not here so we can't discuss bucket one. So I as an action I after this meeting I will go and message into the slack channel basically chasing seeing where we are with that bucket. Uh then we've got bucket two. Devon isn't here but you are George. So, where are you with LLM directed

George Fitzgibbons: behind.

Rebecca Veldon: workflows?

George Fitzgibbons: Uh you don't have to chase me. Uh I am going to block some time right now.

Rebecca Veldon: Beautiful. Um, we then have goal directed task orientated which Doug and Ryan aren't here. So we are are going to be uh as an action. I will then follow up with those two in the Slack channel and get an update on that.

00:12:06

Rebecca Veldon: So, bucket four um where are you

Daniele Stroppa: Um,

Rebecca Veldon: at?

Daniele Stroppa: I think I'll block some time as well. Um, I've got Friday afternoon blocked out for that. So, I'll I'll do that then.

Rebecca Veldon: Perfect. And then

Everett Zufelt: That that makes me feel I like being in bucket five where I don't have to be the first one that says I've done nothing yet. It's nice. It's nice to come in the end of the But maybe Danny, you and I can chat about when we uh how we can collaborate on this one over the next few weeks.

Rebecca Veldon: So

Everett Zufelt: I know you're super super busy, but we can maybe do something async.

Danny Lake: Yeah. Yeah. I haven't been focusing on this.

Everett Zufelt: Yeah. Yeah, I know. Cool. But yeah, like let's I'll shoot you a note on Slack, Danny, and we'll figure out how we can uh pair up on this.

Rebecca Veldon: all right on button. markets. I am going to try and pin you guys down what is the timeline for this because we've currently not had a

00:12:54

Danny Lake: Yes.

Rebecca Veldon: timeline and I feel like if we go we want something from each of them by the end of August before MAC X. Do you all feel that is reasonable or am I cracking the web too much?

George Fitzgibbons: Sounds good to me.

Rebecca Veldon: Fantastic.

George Fitzgibbons: I like

Rebecca Veldon: Then we will update GitHub to

George Fitzgibbons: it.

Everett Zufelt: Maybe we do like a soft What if we were to do a soft deadline four weeks from now and a hard deadline six weeks from now? Like,

Rebecca Veldon: That sounds more

Everett Zufelt: well, bonus points if you get it in by the four weeks.

Rebecca Veldon: reasonable.

Everett Zufelt: Please get it in by the six weeks.

Rebecca Veldon: So there is the working group which is on the 28th of July which is going to be the midway point. I won't be available for that one, but if ever you can chase people go,

Everett Zufelt: Yeah.

Rebecca Veldon: we're now at the halfway point, guys. Where are we at?

Everett Zufelt: Yeah. Love

Rebecca Veldon: And then when I return on the 11th,

00:13:58

Everett Zufelt: it.

Rebecca Veldon: I'm hoping to hear some exciting updates. And because everyone has said every has said that I've done this in order,

Danny Lake: It's

Rebecca Veldon: I'm going to go in reverse and put you on the

Everett Zufelt: Uh oh.

Rebecca Veldon: spot. I might even do one of those spinny wheels and choose one at random. Um but yes, so the aim for

Everett Zufelt: with a last name like a Zufelt. I was always picked last in class for any

Rebecca Veldon: uh so the soft deadline is going to be for the 11th of August with the hard deadline the 25th of August. I will let the people know in the relevant working groups when I do the big update asking uh Kim, Doug, Ryan for updates. How does that sound with everyone? because I know I've talked very quickly without breathing.

George Fitzgibbons: No,

Rebecca Veldon: Okay.

George Fitzgibbons: it all sounds good and I think this is a good orientation to keep us moving. So, uh, no, thank you for that.

Rebecca Veldon: So, we've covered the buckets which we'd love to get something out in six weeks.

00:15:21

Rebecca Veldon: I will let our marketing team know in the Mac Alliance that is our kind of timelines for when we're going to get stuff done. So we don't basically produce a bunch of things and go we would like to show this to the world now please do it. Um so I don't blindsides them. Uh the ebook we're going to aim for the end of August. So these are all basically going to be trickled out from the end of August to Mac X is how I'm seeing it. Um we then have the hackathon which once the brief is ready I will send it over to you George and we can then start doing action points for that. So these meetings will start covering okay where we are with the buckets where we are with the ebook where we are with hackathon and then we've got the demos what we're watching as well. So it might be worth as always starting the meeting with those three action points and then going to the demos for the rest of the

George Fitzgibbons: Cool.

00:16:24

Rebecca Veldon: time.

George Fitzgibbons: Uh, that all sounds good. And now we have structure.

Danny Lake: Okay.

George Fitzgibbons: Uh, so yeah, perfect.

Rebecca Veldon: Um does anyone have anything they'd specifically like to discuss?

Everett Zufelt: I think I this is awesome. I love the structure. I like that we have it. We know where we're going. We know how to get there and we all have a piece to to to take and go do for it. I love that. I think Doug I want to say Doug was joining at the halfway mark to do a demo.

Rebecca Veldon: Mhm.

Everett Zufelt: Is that right?

Rebecca Veldon: I hadn't seen something,

Everett Zufelt: Did I make that up?

Rebecca Veldon: but that doesn't mean

Everett Zufelt: That doesn't feel like I made that up. That feels very specific and like my brain did not make that up. Let's assume that I didn't make that up. Um

Rebecca Veldon: I feel like something got mentioned, but I don't know about the halfway

Everett Zufelt: yeah.

Rebecca Veldon: point.

00:17:24

George Fitzgibbons: Do we want to tell Doug to do it next time because we've got a small audience and now we have a structure.

Rebecca Veldon: Yeah.

Everett Zufelt: Yeah.

George Fitzgibbons: And then to Reca's point, maybe we start I feel like we should update the invite with uh the agenda and you know tease a little so more people come not come but

Rebecca Veldon: Yes,

George Fitzgibbons: you know what I mean uh know what exactly is going to be talked about.

Rebecca Veldon: 100%. So after this I'll update the agenda. and uh update Slack with what we've discussed. Choose the relevant people.

George Fitzgibbons: But all sounds good to me. Ever. Anything? Do we call it early today or do we have anything else? Sounds like we got lunch in order.

Everett Zufelt: I'll share I'll share one thing with the group. Um and like 60 seconds. So last week I was on vacation but I don't um I don't sit well. I don't sit still well. Uh, so last

week while I was on vacation, I was playing around with some things and I'm just going to drop this in the Slack channel for anybody who cares.

00:18:44

Everett Zufelt: So like last year at some point I had this thesis. So for anybody who doesn't know, I'm completely blind and use a screen reader. Um, and last year at some point I had a thesis. If there's agents all over the place doing things, why couldn't we design some agents that pretended they had disabilities? And like, can we give an agent a disability and then have that agent go test a website and then report back how easy or hard the website was for the agent to use with a disability? Turns out that's not like exactly how it can work. And you know, like it's a little bit more deterministic than just go pretend you're blind. But um what I shared in the Slack channel for anybody who cares and just wants to poke around and play and see how I was thinking about it is a little open-source thing that I put together, which is uh a way to test uh kind of like a hybrid deterministic approach to testing a website with uh as on behalf of a keyboard only user or a blind screen reader user.

00:19:56

Everett Zufelt: And so this is something that just kind of goes out there. There you can use it standalone. There's a claude plug-in thing you can install. Anyway, I was I had I was bored. I was sitting outside. I picked this idea up and I put it together. And if anybody wants to pick it apart or play around or do something with it, there you go.

George Fitzgibbons: Wait.

Everett Zufelt: It works better than I imagined it would. All the credit belongs to Fable Five. I'll take credit for the idea. Yeah.

George Fitzgibbons: Yeah.

Everett Zufelt: Hey, that's all I had to share.

George Fitzgibbons: Uh, cool. I am actually going to share it with somebody internally. I had a similar not similar idea,

Everett Zufelt: Cool.

George Fitzgibbons: but we were talking about accessibility in skills. So,

Everett Zufelt: Yeah.

George Fitzgibbons: I like I'm looking at the skill file right now.

Everett Zufelt: Yeah. Yeah. Yeah. Yeah. And they can reach out just uh if they want to like chat about it at some point, just toss them into our shared Orium Versel Slack channel and they can reach out and we can chat about it.

George Fitzgibbons: Okay,

Everett Zufelt: Anyway, that's all I had.

George Fitzgibbons: cool.

Everett Zufelt: I was just playing around on vacation and came up with that thing.

George Fitzgibbons: Awesome. Well, there there's our

Everett Zufelt: There you go.

George Fitzgibbons: demo.

Everett Zufelt: There's your your non-demo demo. Cool. All right. Fun. We've got a mission.

George Fitzgibbons: All right.

Rebecca Veldon: Bro,

Everett Zufelt: All right. Open rock.

Daniele Stroppa: Thank you all.
